The Metrik carbon infrared heater is a beautifully designed, sleek and stylish, wall or ceiling mounted heater. It is the perfect heating solution for indoor and outdoor areas such as terraces, cafes, decks, apartments, workshops, restaurants and bars.

Features

- Can be mounted horizontal or vertical
- Does not burn oxygen, creating an extremely efficient directional heat.
- These heaters do not require the refilling of gas bottles, which can run out at inconvenient times.
- Odour and CO2 emission free.
- Not affected by wind or air movements
- 80% more economical than traditional heating systems
- Remotely enables you to switch between high and low heat levels or set the timer for 1, 3 or 5 hours.
